

THE EDGE

March 1, 2011
Mr Grant Conklin
G-Force Pro Audio

To Whom it May Concern / Grant,

I would like to say Thank You, and Well Done to Grant Conklin for his sound design and installation here at The Edge. We have been very pleased with the products he recommended, sold, installed, and trained us on.

The Edge is a new church, started in 2008, that meets in an old church building built in 1900. As you might imagine, the building was designed for the acoustic amplification of that era...having great sound with today's music/worship style was a challenge. Grant did an excellent job of assessing the situation and designing a system that is perfect for our environment. He also worked very hard to stay within our allotted budget. The end product is a system that is easily expandable as we grow, cost effective, and sounds phenomenal.

At The Edge we enjoy a sound system that is very user friendly, aesthetically pleasing, and provides crystal clear sound. Thank you Grant!

I highly recommend Grant to others that are in the market for amplification services. He did a great job for us.

Sincerely,

Chuck Peterson
